DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, drawn to a method for producing an extrusion-molded catalyst, classified in class 264, subclass 210.6.

Group II, claim(s) 4, drawn to a catalyst for the preparation of an unsaturated aldehyde and an unsaturated carboxylic acid, classified in class 502, subclass 300+.

Group III, claim(s) 5, drawn to a method for producing an unsaturated aldehyde and an unsaturated carboxylic acid by using a catalyst, classified in class 562, subclass 534.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature in the groups is an extrusion-molded catalyst containing at least molybdenum, bismuth, and iron. This element cannot be a special technical feature under PCT Rule 13.2 because the element is shown in the prior art. Japanese Patent JP 2001-205090 teaches the manufacture and catalyst thereof containing at least

Art Unit: 1709

molybdenum and bismuth for use in the synthesis of an unsaturated aldehyde (methacrolein) and an unsaturated carboxylic acid (methacrylic acid) substantially as in claims 1-4 of the instant application and further indicates that iron is a desired component of the catalyst. The reference teaches the production of particles containing catalyst precursors and the subsequent kneading, addition of a binder and a liquid, and molding of these particles substantially as in claims 1-4 of the instant application.

Applicant is advised that in order for the reply to this requirement to be complete, an election of the invention to be examined must be included even though the requirement may be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

1. No claim is allowed.
2. All pending claims are subject to restriction requirement.
